EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.
2. Applicant's election without traverse of claims 1-8 in the reply filed on May 23, 2005 is acknowledged. The method claims 1-8 were searched and found to be allowable primarily because of the use of the apparatus claimed in claims 9-16. The examiner has therefore rejoined the method and apparatus claims. The product claims would not be allowable.
3. This application is in condition for allowance except for the presence of claims 17-25 to an invention non-elected without traverse. Accordingly, *claims 17-25 have been cancelled* without prejudice to the later filing of a divisional application containing the canceled claims.

REASONS FOR ALLOWANCE

4. The following is an examiner's statement of reasons for allowance: The prior art does not teach or fairly suggest methods or apparatus for forming glass material as claimed including a vessel with a refractory metal component having an inner wall that contacts molten glass and an outer wall coated with an oxygen ion transportable material which is then coated with a conductive electrode as claimed. It would not have been obvious to add the oxygen ion transportable material and electrode coatings to prior art vessels or to apply a DC voltage or DC power source as claimed.
